Rotor-Gene Compatible Products

BiogenetX 0.1 ml Strip Tubes and Caps are designed to offer the lowest background and perfectly match the Rotor-Gene Q requirements.

FEATURES:

- Lower background fluorescence
- Better signal to noise ratio
- Easy snap and lock caps
- Reduced evaporation

Tubes and caps are in strips of four and are in separate bags for ease of handling and labeling, the extensions of the caps are frosted. Each box contains 250 strips of tubes and caps respectively. Each case contains 10 boxes.

Cat No	Description	Pack Size	Case Size
RGCS-2500	0.1 ml Strip Tubes and Caps	250x strips	10x packs
